

Eng. Lina Mofleh Qudah is an industrial engineer and senior accreditation and conformity assessment expert with more than 25 years of international experience in quality management systems, accreditation, and certification. She has extensive expertise in establishing, implementing, and assessing management systems for laboratories, inspection bodies, and certification bodies across a wide range of sectors, including chemical, environmental, mechanical, electrical, and medical fields.

She has served as a lead assessor and peer evaluator under ISO/IEC 17011 since 2016 and has conducted hundreds of accreditation assessments against international standards such as ISO/IEC 17025, ISO/IEC 17020, ISO/IEC 17065, ISO/IEC 17021-1, ISO/IEC 17024, and ISO 15189 on behalf of national and international accreditation bodies. She is also an IRCA-certified QMS Lead Auditor and an approved assessor and trainer for several accreditation systems in the Middle East and internationally.

Eng. Qudah has held senior leadership positions, including Director of the Dubai Accreditation Center, where she led the establishment and international recognition of the accreditation body under ILAC and IAF. She currently serves as General Manager of LMQ Management System Solutions, providing consultancy, training, and assessment services to conformity assessment bodies and accreditation bodies in the Middle East, North Africa, and beyond.

She has actively contributed to ILAC and IAF technical committees, participated in international policy development, and delivered more than 70 specialized training courses in accreditation, conformity assessment, and risk-based management systems in both Arabic and English. Her work includes extensive collaboration with international organizations such as UNIDO, USAID, GIZ, and regional accreditation initiatives, supporting capacity building and international recognition of accreditation systems.
