

Professor Lotfi Monser is a senior academic and technical evaluator specializing in analytical and environmental chemistry, with more than 30 years of experience in higher education, research, and laboratory accreditation. He holds a PhD in Analytical Chemistry from the University of Hull (UK) and a Habilitation in Analytical and Environmental Chemistry from the University of Tunis El Manar. Since 1997, he has served as a University Professor at INSAT, University of Carthage, where he lectures and supervises postgraduate research in advanced analytical techniques, method development, validation, and environmental applications.

Professor Monser has extensive expertise in laboratory accreditation and conformity assessment, having acted as a technical assessor and expert for numerous national and regional accreditation bodies, including TUNAC and the GCC Accreditation Center (GAC). His work covers ISO/IEC 17025 accreditation in diverse sectors such as food, environmental, pharmaceutical, petrochemical, polymer, and biological analysis. He has conducted assessments, audits, training, and technical assistance missions across the Middle East, Africa, and Europe.

An active researcher, Professor Monser has authored and co-authored more than 50 peer-reviewed scientific publications focusing on analytical method optimization, chemical sensors, molecularly imprinted polymers, environmental remediation, and advanced chromatographic and electrochemical techniques. His profile combines strong academic leadership, applied research excellence, and internationally recognized competence in laboratory accreditation and quality assurance.
